

RELIABLE SEPERATOR & DECANter SOLUTIONS

Care Centrifuge is a specialized engineering company focused on maximizing the efficiency and reliability of separator and decanter systems.

Accompanied by an expert centrifuge service team, Care Centrifuge is dedicated to excellence to ensure the highest standards of quality, teamwork, transparency and integrity.

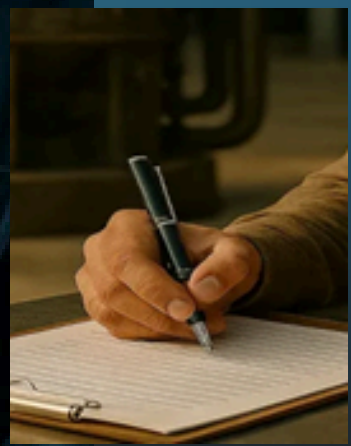

EXPERIENCED TEAM

Our skilled team ensures efficient solutions and high-quality results for every project.

RESPONSIBILITY

We remain true to the same principles on since our company was founded.

- TECHNICAL SUPPORT
- SPARE PARTS SUPPLY
- ON-SITE MAINTENANCE
- LONG TERM SERVICE CONTRACTS

PREVENTIVE MAINTENANCE CONTRACTS

- Scheduled Visits
- Full Equipment Reports
- Priority Support

TECHNICAL CONSULTANCY

- Capacity Optimization
- Process Upgrades
- System Integration

DECANTER MAINTENANCE

Care Centrifuge offers a comprehensive and optimized maintenance program tailored to meet your specific requirements and budget which includes several scheduled services:

- Analysis of operating conditions
- Recommendation of service intervals and maintenance plan according to application
- Onsite performance of major and intermediate service according to service manual
- Supply of spare parts
- Recommendations for repair in a service center, if needed
- Control Panel Automation and upgrades
- Inspect the breakers, relays, PLCs, I/O cards, transformers, HMIs, and VFDs. It may be time to upgrade your electrical components to increase efficiency.
- Dynamic, high-speed, hard bearing balancers

SEPARATOR MAINTENANCE

Care Centrifuge separator service experts work together with customers to maximize the availability of their plants and lift the overall production efficiency of their operations.

Care Centrifuge specialists are ready to provide routine and corrective maintenance for all major brands and models. Services include:

- Inspections of the separator
- Vibration analysis to detect issues with bearings and other rotating components
- Disassembly
- Cleaning of the separator and its components
- Repair and replacement of worn or damaged parts
- Assembly
- Check and adjustment
- Pressure testing to detect leaks and other issues with the separator
- Function check and report

BOWL BALANCING

Rebalancing of bowl assemblies is always necessary after replacing certain bowl parts.

This way a considerable saving was made on the repair cost per separator.

”

ON-SITE SERVICES

The field service is carried out exclusively by experienced specialists who receive constant further training and who are accordingly able to provide state-of-the-art solutions.

Our field service team offers a wide variety of services, from basic maintenance to complete overhauls. We have the expertise and knowledge to troubleshoot and repair your equipment quickly and efficiently, so you can get back to your business as soon as possible.

We use only the highest-quality parts and supplies to ensure that your separator functions at optimal levels.

PREVENTIVE MAINTENANCE CONTRACTS

Preventive maintenance is a proactive approach to maintenance that involves regularly inspecting, cleaning, lubricating, repairing, and replacing components of equipment to prevent breakdowns and prolong the life of the equipment.

You may take advantage of “Through Preventive Maintenance” service to ensure that your separators and decanters always stays, and performs, in its optimum condition.

Through Preventive Maintenance we strive to achieve a “no-faults” result, keeping the separators and decanters in its best possible condition, preventing the occurrence of any breakdowns, saving you time and money.

“

SEPARATOR CONTROLS SYSTEMS

Care Centrifuge offers a comprehensive and optimized maintenance program tailored to meet your specific requirements and budget which includes several scheduled services:

WORKSHOP SERVICES

At Care Centrifuge, we pride ourselves on providing top-tier service through our state-of-the-art workshop, fully equipped with the latest technology and testing benches.

We conduct thorough assessments using advanced testing benches to evaluate both separators and decanters. By simulating factory specifications, we identify any potential issues and provide effective solutions to maintain the efficiency and longevity of your centrifuge systems.

SPARE PARTS

Care Centrifuge's spare parts are created to perfectly fit and function in our separators and decanters. They have the right dimensions and material quality and they're easy to get all over the world with Care Centrifuge's commitment to quick delivery.

We make sure you have the right parts with the right packaging, instructions, and perfect fit. This kind of equipment care prolongs your machine's usable lifetime while keeping its value high. On top of that, our experts will help you with inventory planning for extra convenience.
